Automotive Technology Engineering, Manufacturing & Industrial Technology Pathway

This National Automotive Technician Education Foundation (NATEF) certified program covers these areas of automotive service: engine, brakes, electrical & electrical systems, steering & suspension, auto & manual transmissions and air conditioning. Students may have the opportunity to become state certified, as well as to earn credit towards completion of an associate degree or other post-secondary training.

Students may take this course for two years.

“This class is really fun; it’s all hands-on!”

- Austin Eaton, Vicksburg
