
Installation of MiCase Windows Applications from a Windows 7 Desktop

1. Locate the release file to install (ex: hrupdate_20110627.exe) and select “save as” to download it to your desktop.
2. Double click on the application icon to open the Installation Files Setup Wizard.
3. The Installation Files Setup Wizard screen will appear > Click Next to continue.
4. Select Destination Location > C:\KTSInstall should be showing in the file path > Click Next to continue. You may receive the following message: “The folder C:\KTSInstall already exists. Would you like to install to that folder anyway?” Click Yes to continue.
5. Ready to Install > Click Install to continue.
6. The Kalamazoo RESA System Update screen will appear. Normally you would select your drive to install to. Instead, click Cancel to cancel out of the remainder of the installation process.
7. The Completing the Installation Files Setup Wizard screen will appear > click Finish to close the process.
8. Go to the C:\KTSInstall folder.
9. Verify that the *update.zip* file is the correct date.
10. Run the *setup.exe* (double-click) to complete the installation to the selected network drive. Enter the drive to install to and click on Install Now.
11. When complete, you may delete the release file from your desktop
