

Pay Calculation Breakdown

Your pay is calculated by multiplying the number of days you work this school year (e.g., 170) by your hourly rate (e.g., \$15.80) and the number of hours you work per day (e.g., 7.5). This total is then divided by the number of remaining pay periods (e.g., 24 pay periods, with a full year having 26 pay periods).

1. Determine Total Days Worked:

- **Total Days Worked in the School Year** = 170 days

2. Multiply by Hourly Rate:

- **Hourly Rate** = \$15.80/hour

3. Multiply by Hours per Day:

- **Hours Worked per Day** = 7.5 hours

4. Divide by Number of Pays:

- **Total Pays** = 24 (biweekly pay periods)

Step 1:

Total Earnings = Hourly rate × Hours per day × Total Days

Total Earnings = \$15.80 (hourly rate) × 7.5 (hours per day) × 170 days

Step 2:

$$\text{Biweekly Pay} = \frac{\text{Total Earnings}}{\text{Total Pays}}$$

$$\text{Biweekly Pay} = \frac{\$20,145}{24} = \$839.38 \text{ pre-tax and deductions}$$
